Stack Navigation

Navigation

- ▶ React Navigation <https://reactnavigation.org>
- ▶ <https://reactnavigation.org/docs/en/getting-started.html>
- ▶ npm install --save react-navigation
- ▶ NavigatorIOS
- ▶ <https://facebook.github.io/react-native/docs/navigatorios.html>

Navigation

- ▶ 1. Creating a stack navigator
- ▶ 2. Moving between screens and going back
- ▶ 3. Passing parameters to routes (between page)
- ▶ 4. Configuring the header bar

Drawer Navigator

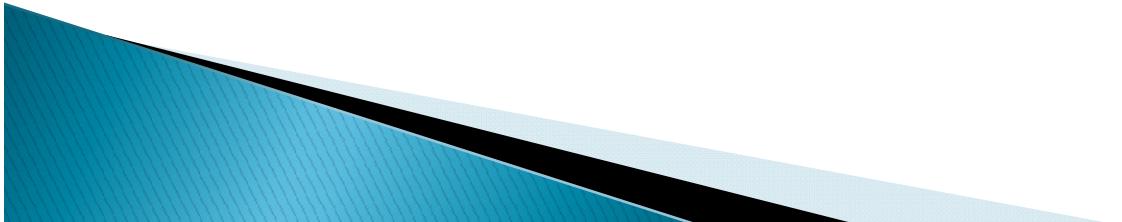

- ▶ <https://reactnavigation.org/docs/en/drawer-navigator.html>

ติดตั้ง Icons

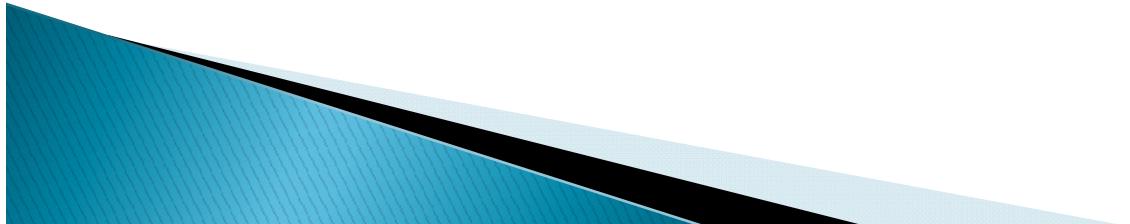

▶ <https://github.com/oblador/react-native-vector-icons>

1. สำหรับ android เปิดไฟล์ android/app/build.gradle เพิ่ม 1 บรรทัด
apply from: "../../node_modules/react-native-vector-icons/fonts.gradle"
2. ใช้คำสั่ง react-native link
3. แก้ไข path ให้ถูกต้องในไฟล์ settings.gradle (ใน android studio)

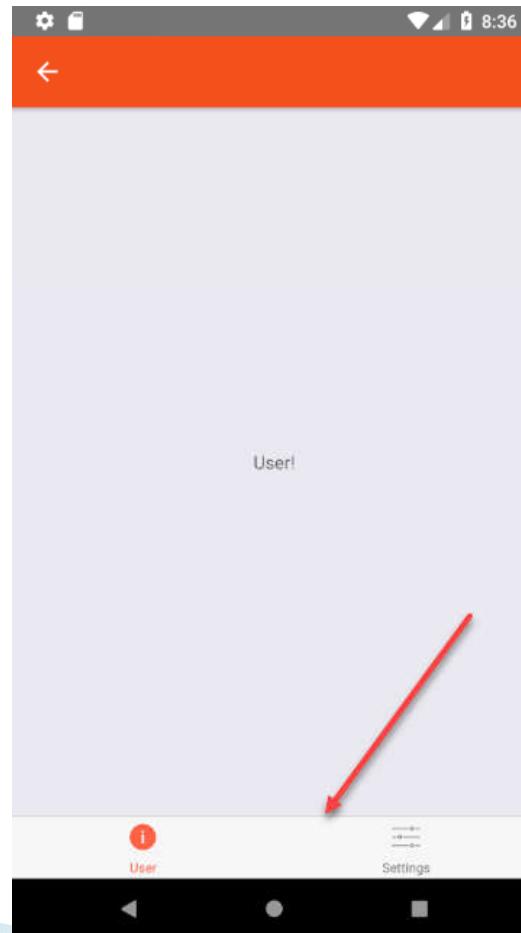

ทดลองเพิ่มปุ่ม (ไอคอน) ที่ header

- ▶ <https://github.com/vonovak/react-navigation-header-buttons>
- ▶ สร้างไอคอนเมนูด้านซ้ายของหน้า Home

การใช้งาน Tab navigation

- ▶ <https://reactnavigation.org/docs/en/tab-based-navigation.html>

The end
